 Colour Shuffling

Premium Pack I

Add advanced new features to your
PR1000e, PR-1000 machine

- Image Scanning function
- Colour Shuffling function
- Border connection
- Stitch recalculate
- 10 new embroidery designs
- 2 new embroidery fonts

Premium Pack I

Compatible with the **PR1000e**, **PR-1000**

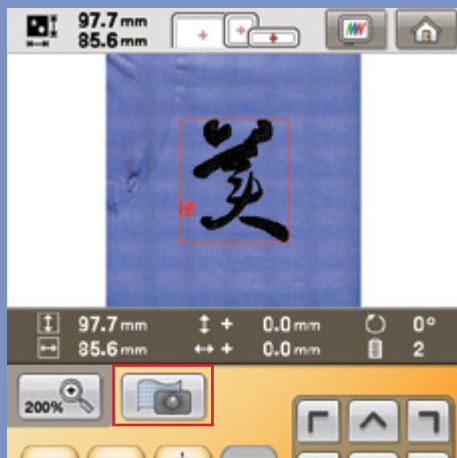

Image Scanning function

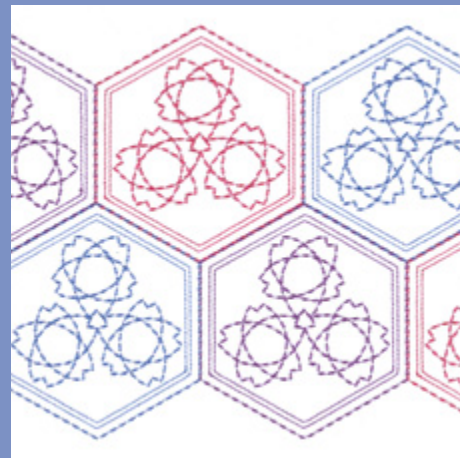

Use the camera to scan the fabric in the embroidery area. View the image on the LCD display and place the design exactly where you want it and see what it will look like.

Colour Shuffling

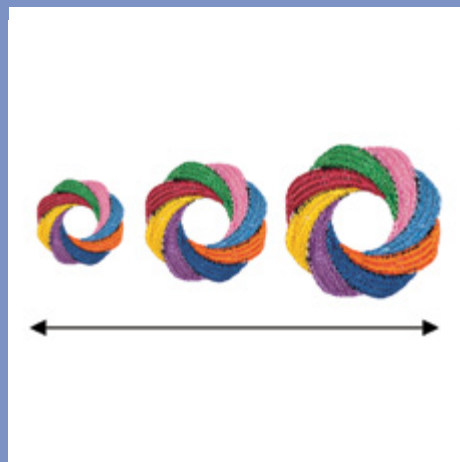

Exclusive Colour Shuffling Function allows you to change embroidery design colour palettes with the touch of a button.

Choose from "Random", "Gradient", "Vivid" and "Soft" styles and select your favourite from the options displayed on screen.

Border connection

Embroidery design connection for perfectly aligned borders and designs.

Stitch Recalculate

Automatically adjusts the number of stitches when enlarging or reducing a design.

Re-sized designs will look just as good as the original – no need to worry about the enlarged designs looking too thin or reduced designs with stitches too close together.

10 new embroidery designs

2 new embroidery fonts
